

Web Developer

Xgrid Web Developers are skilled and talented professionals, who can design, deploy and test breakthrough websites. You will enjoy being part of an extremely talented, motivated team interacting with both business and development counterparts to capture key marketing requirements and translate them into products designed for our customers. Moreover, you will be encouraged to become active in open source communities. This will provide you a unique exposure of the entire ecosystem (involving technology, community, customers and partners) in the cutting-edge data center and cloud space.

The successful candidate will be an enthusiastic self-motivator, which is an absolute MUST in a startup environment. They will have a high customer and product delivery orientation, with the ability to both, understand the “big picture” issues and to drill down to detail.

Job Requirements

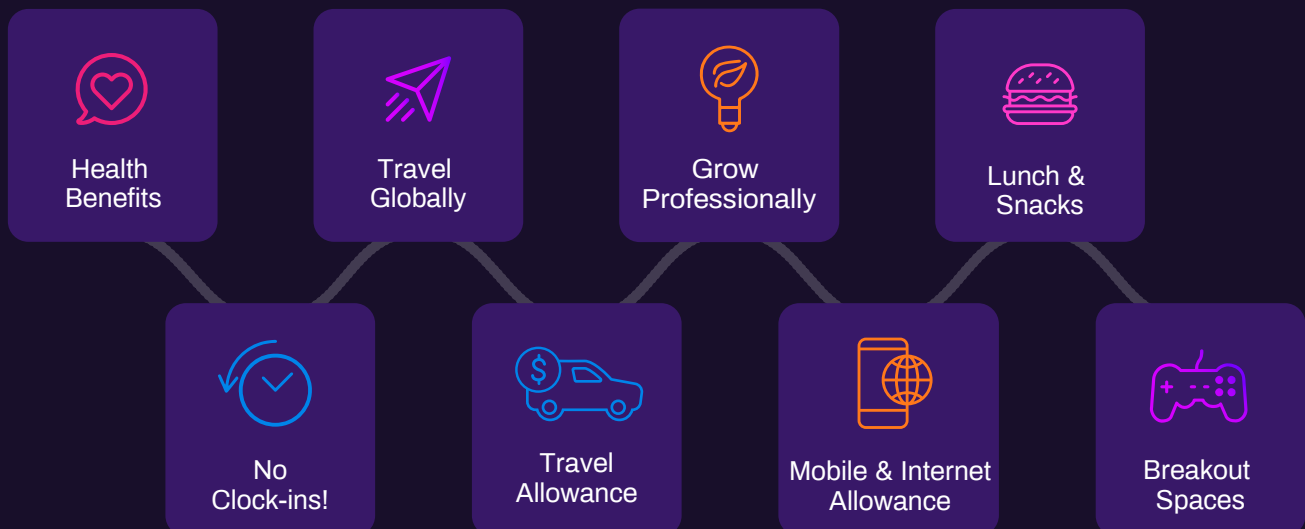

You will be expected to

- ▶ Use knowledge of website development and product feature integration in order to architect end-to-end web solutions for our customers.
- ▶ Reduce the page load time across the website by making optimizations to scripts, images and animations, ensuring optimal user experience and page load speed on desktop and mobile.
- ▶ Be involved in active discussions on open source community forums, code reviews, and proposing, implementing, and testing blueprints to design production-grade solutions for our customers.
- ▶ Have the ability to lead the entire feature lifecycle (from the design to the delivery phases) of applications and products.
- ▶ Ability to define and review the website architecture to meet high levels of scalability, resilience, and fault-tolerance.
- ▶ Document code implementation details.
- ▶ Design GUI that is user-friendly, operationally functional and visually appealing
- ▶ Improve development processes, inspire and motivate others, work as a promoter of new ideas and technology solutions in virtualization and networking space.

Job Qualification

- ▶ BS in Computer Science/Software Engineering or similar
- ▶ Working knowledge of the following technologies: web front-end (HTML, SCSS/CSS, Javascript), Backend (PHP) is a must.
- ▶ Strong knowledge and design concepts of object-oriented programming/development and asynchronous JavaScript.
- ▶ Proficient knowledge of Wordpress framework, ability to develop/extend modules, create customized landing pages and integrate dynamic plugins. (Understanding of CMS like Magento and Shopify would be plus point)
- ▶ Must have expertise in libraries and frameworks like Bootstrap and JQuery (Understanding of React/Angular would be a plus point)
- ▶ Basic knowledge of Search Engine Optimization process and tracking tools like Google Analytics and Facebook Pixels.
- ▶ Proficient knowledge of Optimization of the website for maximum speed and scalability
- ▶ Advanced knowledge of MySQL.
- ▶ Experience integrating with web technologies and REST APIs.
- ▶ Thorough knowledge of software development life cycle and best practices, including coding standards, code reviews, source control management, build process, continuous integration, and continuous delivery.
- ▶ Strong grip and proficient understanding of version control tools, such as Git.
- ▶ Knowledge of authentication and access control principles.
- ▶ Strong software debugging and problem-solving skills.
- ▶ Quick learner and ability to adapt to a customer-driven and fast-paced development environment. Aptitude to learn new bleeding-edge technologies.
- ▶ Team player with outstanding collaboration and teamwork attitude.
- ▶ Excellent written and verbal communication skills.
- ▶ Excellent analytical and problem-solving skills.
