

Microsoft Dynamics NAV/ Business Central Developer

Xgrid MS Dynamics 365 Business Central Developers are skilled and talented professionals, who can design, deploy and test breakthrough solutions based on Microsoft Dynamics 365 Business Central/Microsoft Dynamics Navision. You will enjoy being part of an extremely talented, motivated team interacting with both business and development counterparts to capture key marketing requirements and translate them to products designed for our customers.

The ideal Xgrid Engineer will have experience developing and delivering complex “enterprise grade” mission-critical automated systems for our data center and cloud customers. The successful candidate will be an enthusiastic self-motivator, which is an absolute MUST in a startup environment. They will have a high customer and product delivery orientation, with the ability to both understand the “big picture” issues AND to drill down to detail.

Job Requirements

- ▶ The main technical focus of this role will be programming using Microsoft Dynamics AL/extension V2 along with some minor C/AL components.
- ▶ Configure, develop and deliver MS Dynamics NAV/ Business Central software and components in all functional areas.
- ▶ Create new and modify existing customizations and integrations as requested by the customer.
- ▶ Perform data conversions, debug system problems, and craft resolutions.
- ▶ Develop solutions in Dynamics NAV and apps/ extensions for Business Central along with upgrades and migrations for customers.
- ▶ Installation and configuration of Business Central, along with service packs and hot fixes as needed.
- ▶ Technical liaison to business groups for application support.
- ▶ Test functionality developed by the development team against business requirements.
- ▶ Support and drive process change and communication in line with Business Central/NAV best practice.
- ▶ Coordinate and contribute to end-user training including development of system documentation and training materials.
- ▶ Assist with functional specifications of customizations and integrations required for NAV implementations.
- ▶ Serve as the lead Business Central/NAV technical expert on the development team.
- ▶ Take responsibility for the customized unit programming and overall system functionality.
- ▶ Work with the Project Managers, Business Analyst and Consultants to understand the business / application requirements of the assigned task.
