

Full Stack Developer (Entry Level)

Xgrid FullStack Developers are skilled and talented professionals, who can build innovative cloud-native software systems. You will work with an early stage Silicon Valley startup, pioneering new innovations in Kubernetes reliability.

Come join us and...

- ▶ Do what nobody else in the world is doing... literally
- ▶ Gain world class knowledge and expertise on the inner workings of Kubernetes
- ▶ Research on patterns that push our understanding and knowledge of operating large scale cloud platforms
- ▶ Gain practical experience building and operating incredible distributed systems software
- ▶ Contribute to open source communities

The ideal candidate must be passionate about solving novel, complex technology problems, and should be able to do so in about one-third the time most people think possible. Top-notch coding skills are essential.

Basic Qualifications

- ▶ Bachelor's degree in Computer Science, Computer Engineering or related field
- ▶ Experience on JavaScript / TypeScript Frameworks (Angular, React, etc.)
- ▶ Proficient and passionate Angular / React, Typescript and NodeJS developer.
- ▶ Experience in object-oriented design, unit testing and system architecture

Preferred Qualifications

- ▶ Expert knowledge of developing feature rich applications using web technologies: web front-end (Angular, React, HTML, SCSS/CSS, Javascript), Backend (NodeJS, Express Framework) is preferred
- ▶ Basic proficiency in MEAN Stack, MERN Stack, and FullStack technologies.
- ▶ Experience in State Management frameworks/libraries. Redux, NgRx is a nice plus.
- ▶ Knowledge of NoSQL databases (MongoDB, Redis, Firebase)
- ▶ Solid understanding of HTTP protocol and how server-side code is processed on the client.
- ▶ Experience with webpack, grunt and other build tools is a plus.
- ▶ Knowledge of authentication and access control principles
- ▶ Proficiency with Data visualization and charting tools/ frameworks like HighCharts, AMCharts and D3.JS is a plus
