

Full Stack Developer

Xgrid Full Stack Developers are skilled and talented professionals, who can design, deploy and test breakthrough software for clouds and data centers. You will enjoy being part of an extremely talented, motivated team interacting with both business and development counterparts to capture key marketing requirements and translate them to products designed for our customers. Moreover, you will be encouraged to become active in the open source communities. This will provide you a unique exposure of the entire ecosystem (involving technology, community, customers and partners) in the cutting-edge data center and cloud space.

The ideal Xgrid Engineer will have experience developing and delivering complex “enterprise grade” mission-critical automated systems for our data center and cloud customers. The successful candidate will be an enthusiastic self-motivator, which is an absolute MUST in a startup environment. They will have a high customer and product delivery orientation, with the ability to both understand the “big picture” issues AND to drill down to detail.

Job Requirements

- ▶ Use knowledge of software development and product feature integration in order to architect end-to-end solutions for our customers.
- ▶ Follow software development lifecycle processes
- ▶ Have the ability to lead the entire feature lifecycle (from the design to the delivery phases) of applications and products. This includes:
 - ▷ Ability to define and review architecture, implementation and test specifications to ensure that the product architecture continues to meet high levels of scalability, resilience and fault-tolerance;
 - ▷ Ability to execute the implementation specs with a team of engineers; demonstrated knowledge of coding modules;
 - ▷ Ability to drive the integration and automated testing (at unit, functional and scale granularities) efforts to ensure that the product meets the requisite production quality metrics.
- ▶ Be involved in active discussions on open source community forums, code reviews, and proposing, implementing, and testing blueprints to design production-grade solutions for our customers.
- ▶ Demonstrate designs using documents, flowcharts, layouts, diagrams
- ▶ Prepare any and all other regular and special documentation as needed.
- ▶ Design GUI that is user-friendly, operationally functional and visually appealing
- ▶ Investigate and analyze software issues
- ▶ Share team leadership responsibilities, including:
 - ▷ Mentoring, coordinating activities, improving engineering processes, inspiring and motivating others, working as a promoter of new ideas and technology solutions in virtualization and networking space.

Job Qualification

- ▶ BS in Computer Science, Software Engineering or related technical field
- ▶ Proficient and passionate Angular/React, Typescript and NodeJS developer.
- ▶ Working knowledge of following technologies: web front-end (Angular, React, HTML, SCSS/CSS, Javascript), Backend (NodeJS, Express Framework) is a must.
- ▶ Strong knowledge and design concepts of object-oriented programming/development and asynchronous JavaScript.
- ▶ Advanced proficiency in various MEAN Stack and Full Stack technologies.
- ▶ Must have a strong grip on ReactiveX asynchronous programming. Observables (RxJS).
- ▶ Experience in State Management frameworks/libraries Redux, NgRx is a nice plus.
- ▶ Quick learner and ability to adapt to customer driven fast-paced development environment. Aptitude to learn new bleeding-edge technologies.
- ▶ Team player with outstanding collaboration and teamwork attitude.
- ▶ Excellent written and verbal communication skills.
- ▶ Excellent analytical and problem solving skills.
- ▶ Knowledge of all aspects and elements of network management system is a plus.
- ▶ Experience working with Docker containers and AWS cloud environments is a plus.
- ▶ Advanced knowledge of NoSQL databases (MongoDB, Redis, Firebase).
- ▶ Proficiency with Data visualization and charting tools/frameworks like HighCharts, AMCharts and D3.JS is a huge plus.
- ▶ Experience integrating with web technologies, REST APIs, and websockets.
- ▶ Proficiency in the following skills and technologies is preferred:
 - ▶ Test Driven Development / Continuous Integration/ Delivery/DevOps.
 - ▶ Thorough knowledge of software development life cycle and best practices, including coding standards, code reviews, source control management, build process, continuous integration and continuous delivery.
 - ▶ Strong grip and proficient understanding of version control tools, such as Git.
 - ▶ Experience with webpack, grunt and other build tools is a plus.
 - ▶ Knowledge of authentication and access control principles.
 - ▶ Strong software debugging and problem solving skills.
 - ▶ Strong skills in information gathering and requirement documentation.
