

Xgrid Developers are skilled and talented professionals, who can design, deploy and test breakthrough software for mobile, cloud and data centers. You will enjoy being part of an extremely talented, motivated team interacting with both business and development counterparts to capture key marketing requirements and translate them to products designed for our customers. Moreover, you will be encouraged to become active in the open source communities. This will provide you a unique exposure of the entire ecosystem (involving technology, community, customers and partners) in the cutting-edge data center and cloud space. The ideal Xgrid Developer will have experience developing and delivering complex “enterprise grade” mission-critical automated systems for our data center and cloud customers.

Skills & Responsibilities

- ▶ Design and build applications for the iOS platforms
- ▶ Ensure the performance & quality of applications.
- ▶ Develop new features & identify and correct bottlenecks and fix bugs.
- ▶ Good understanding of the design patterns e.g. MVC, MVP, VIPER
- ▶ Experience with Test Driven Development (TDD)
- ▶ Proficient understanding of code versioning tools such as Git

Qualification

- ▶ At least 1 year of experience in Objective-C and Swift (Swift is a must)
- ▶ Experience with iOS frameworks such as Core Data, Core Animation, MapKit etc.
- ▶ Experience with offline storage.
- ▶ Familiarity with RESTful APIs to connect iOS applications to back-end services.
- ▶ Understanding of Apple’s design principles and interface guidelines.
- ▶ Familiarity with local and push notifications.
- ▶ Familiarity third-party libraries e.g AFNetworking, Alamofire, Payment gateway, Crashlytics, and Fabric.
- ▶ **Good to Have:** Knowledge of Android SDK and Java
